

THE M5

PRICE LIST APRIL 2020

BMW M5 PRICE LIST. APRIL 2020.

CO ₂ Tax including 15% VAT	M5 Competition
8-Speed M Steptronic Automatic transmission with Drivelogic	19 872.00

Recommended retail price including 15% VAT, but excludes CO₂ emissions tax

Standard Model	M5 Competition
8-Speed M Steptronic Automatic transmission with Drivelogic	2 099 000

Engine Specifications and Performance*	M5 Competition
Cylinders/valves	V8 8/4
Capacity (cc)	4 395
Maximum Power (kW/rpm)	460/6 000
Maximum Torque (Nm/rpm)	750/1 800 - 5 860
Top speed (km/h)	305
Acceleration 0 – 100 km/h	[3.3]
Combined Consumption (l/100 km)	[10.4]
CO ₂ (g/km)	239

*The published fuel consumption and CO₂ emission figures are established according to legislated technical specifications (UNECE Regulation 101/UN Regulation 83 and SANS 20101 standards), which sets out the procedures that are used to measure the CO₂ emissions and fuel consumption. The claimed figures are established using specific tests under standardised, carefully controlled conditions and may differ from consumption achieved under real world conditions with the influences of altitude, road surface, geographic conditions, vehicle options, temperature, humidity, tyres size and driving behaviour amongst others. EU Unladen mass refers to a vehicle with standard equipment, with 90% fuel tank fill, including a driver (68 kg) and luggage (7 kg). Optional extras and accessories will generally increase this figure and as a result affect some of the technical figures, in specific fuel consumption and CO₂ emissions. Please contact your preferred authorised BMW dealer or BMW South Africa (Pty) Ltd. for information on vehicles that are available for sale, and the various specifications and options of vehicles that are available.

Code	Drivetrain Technology	M5 Competition
	8-Speed M Steptronic Automatic transmission with Drivelogic, M Control concept consisting of M gear selection lever, Drivelogic buttons with three stages, shift paddles on steering wheel	■
	Active M Differential, electronically controlled multi-plate limited-slip differential	■
	Automatic Start/Stop function, reduces fuel consumption by switching off the engine when the vehicle comes temporarily to a stop	■
	M TwinPower Turbo 8-cylinder petrol engine, including cross-bank exhaust manifold, combines two twin-scroll turbochargers with Valvetronic, Double VANOS and High Precision Injection	■
	Brake discs, compound structure, front and rear, internally-ventilated, drilled	■
	Brake Energy Regeneration	■
	Brake pad wear indicator, single-stage wear measurement, front and rear	■
	Driving-dynamic control systems, enables individual adjustment of propulsion, chassis and suspension components (e.g. throttle response, Power steering and Dynamic Stability Control systems)	■
SA223	Dynamic Damper Control (EDC), suspension automatically adapts to road conditions. The Driving Experience Control includes Comfort+ as an additional setting	■
	Electronic differential lock, specific DSC tuning with traction optimisation; optimises acceleration out of turns and sharp bends by braking at the rear wheels; function is possible in DSC-OFF mode only	■
	Exhaust tailpipe visible, round, left and right, twin dual with finisher in high-gloss chrome	■
SA2NK**	M Carbon ceramic brake, increased fading stability and thermal stability high wear resistance and corrosion resistance as well as reduction in rotating wheel masses, brake callipers in matt Gold, with M lettering at front, brake discs perforated, front 400mm x 38 mm, rear 380 mm x 28 mm	128 200
SA1MA	M Sports exhaust system	■
	Oil sensor for level and grade, electronic sensing of oil grade and level, indication in the instrument cluster	■
	Steering, electrically assisted	■
	Suspension Lowering by 7mm	■

**Dependent on conditions and usage, features specific to the materials used can lead to operational noises particularly in wet conditions just before the vehicle comes to a halt. The impact of moisture and road salt can cause the braking action to be equivalent to a conventional brake system. This can for a short time be experienced as a reduction in braking action and can be balanced out by greater pressure on the pedal where necessary.

Code	Packages	M5 Competition

------	--------------------	----------------

SA453	Active seat ventilation in the front seats	■
SA4NM	Ambient Air Package. Air ionisation and scents for the vehicle interior. Intensity of the scents can be controlled in three stages via the iDrive controller or button in the air conditioning control panel. Two selectable scent cartridges can be fitted in the glove compartment with a durability of approximately six months with average use. Refills can be ordered via BMW accessories. The starter kit contains two scents: Blue Suite No. 1 (fresh water scents), and Golden Suite No. 2 (warm, rich scents).	4 600
SA4UR	Ambient light package	■
SA775	Anthracite roof lining Armrest front, in the centre console with storage compartment	■
SA4NB	Automatic air conditioning with 4-zone control, temperature and air volume control, automatic programme with 5 intensity levels, separate adjustment for driver and front passenger, front air-conditioning control panel with full-colour display and control via touch operation on some function buttons, separate setting of temperature stratification for driver and front passenger via MMI (menu entry button on air conditioning control field), 2 extra vents in the B pillars, 7 air distribution programmes, SYNC function, maximum cooling, residual heat utilisation, automatic recirculated air control (AUC) can be activated via MMI, recirculated air control can be activated by button, fogging sensor and solar sensor, micro-filter and active carbon filter, auxiliary ventilation. In the rear, separate air conditioning control panel with separate temperature setting for left / right, air volume control and air distribution control left / right jointly, 3 air distribution programmes, maximum cooling, automatic programme with 5 intensity levels, can be set left / right jointly. Illuminated thumbwheels, chrome finisher on rear centre console	■

Code	Interior Equipment continued	M5 Competition
SA3DS	BMW display key. With touch control LCD colour display for vehicle status information (e.g. fuel gauge, range, service information, vehicles locking status, etc.). Charging also possible within the vehicle via the phone wireless charging function. Key dimensions: approximately 90mm x 55mm x 15mm. Range for info update up to approximately 300m and for locking functions approximately 30m. 1 x Display key and 1 x Radio Remote control key with a mechanical key.	■
SA6U8	BMW Gesture Control. Specifically defined functions can be controlled in the detection range above the front centre console using hand gestures. Functions that can be operated by gestures include volume control, accepting and rejecting an incoming telephone call, closing externally triggered popups (e.g. traffic news), confirmation of Check-Control messages, triggering of a personally configured function and Surround View	■
SA4M8	BMW Individual rear-seat reading lights	■
	Centre armrest in rear, foldable, with 2 cupholders	5 400
SA4U1	Ceramic surround for controls, details in ceramic: gear selection lever, bezel for iDrive controller, audio and A/C controls	■
	Door Sill strips illuminated, with M5 lettering	8 000
	Electronic vehicle immobiliser (EWS IV)	■
SA416	Electric rear screen roller sun blind with manual side blinds	■
SA4U0	Galvanic embellisher for controls	2 700
	Grab handles, integrated in roof lining	■
	Interior lighting, front centred over interior mirror and in rear centre, front reading lights, vanity mirror lights in sun visor, front footwell lights, automatic interior light activation by door-opener handle, ignition, collision sensor and radio remote control	■
	Keyless engine start, Start/Stop button, including MSA OFF button	■
	Locking system with central locking, including 2 remote controls with integrated key, central locking for all doors, fuel filler flap and tailgate, separate button for exclusive opening of tailgate, adjustable automatic locking after pulling away by means of 'Personal Profile'	■
	Luggage-compartment light	■
SA5DS	Luggage-compartment emergency release	■
SA4T7	Massage function for front seats	14 400
SA4GQ	M seat belts, in black with coloured M seam for all seats	■
SA6WB	Multifunctional instrument display, central element of driving experience staging, combines round instruments with chrome rings with high-resolution 12.3" colour display using black-panel technology. The different drive characteristics ECO PRO, Comfort and Sport are staged in characteristic designs in accordance with the mode selected at the Driving Experience Control incl. ECO PRO	■
SA4MA	M multifunctional seats for driver and front passenger, including SA459 Seat adjustment, electrical with memory for driver and front passenger, SA488 Lumbar support for driver and front passenger. Electric adjustment of the upper section of the backrest, backrest width, and thighrest. Comfort headrests with electric adjustment for headrest height, rear headrest unit mechanical foldable. M embossing on the headrest.	■
	On-board computer, with indicator in instrument display and remote control by steering-column stalk. Display of average consumption and current consumption, range, average speed, clock and date, outside temperature with acoustic ice warning (at +3 °C)	■
	Personal Profile, content depends on selected optional equipment. Operation by radio. Extended scope (selectable by iDrive controller)	■
SA776	BMW Individual headliner Alcantara anthracite	18 600
SA494	Seat heating for driver and front passenger	■
SA4HA	Seat heating front and rear	5 500
SA441	Smoker's package	■
SA323	Soft-Close function for doors	9 700
SA248	Steering-wheel heating	2 500
	Sun visors, with vanity mirror and slide cover for driver and passenger, ticket holder.	■
SA465	Through-load Facility, 40/20/40 backrest split, right 40% seat section individually foldable, middle 20% seat section individually foldable, left 40% seat section and middle 20% section only foldable together	■
SA423	Velour floor mats	■
	M5 Competition specific floor mats	■
	Window lifts, electrical, toll-booth function 'open-close' on driver's and passenger sides, convenient opening and closing (also via radio-remote control), trap release	■

Code	Safety	M5 Competition
	3-point seat belts, at all seats, including pyrotechnic belt tensioners at front and belt force limiters at front, rear belt buckles coded to prevent occupants from attempting to use wrong belt	■
	3rd brake light using LED technology on top of rear window	■
SA5AL	Active Protection including Attentiveness assist. This safety package initiates protective measures for the occupants if an accident situation is imminent. The fatigue detector recognises tiredness and increasing lapses in concentration by monitoring driving behaviour	5 000
SA552	Adaptive LED headlights, LED technology, accent lighting with turn indicators, low-beam and high-beam headlights, daytime running lights, (Expanded lighting functions for improved visibility: no-dazzle high-beam headlights (BMW Selective Beam), light colour close to that of ordinary daylight, optimum, homogeneous illumination of the freeway, contains the contents of option code 524 'Adaptive headlights' LED tubes of the daytime driving lights are hexagonal and extend up to the kidney grille element	■
SA302	Alarm system with radio remote control, for monitoring doors, engine-compartment lid and tailgate, including interior-movement sensor, tilt sensor and emergency power siren, including anti-theft security system	■
	Antilock Braking System (ABS), maintains the steerability of the vehicle irrespective of road-surface conditions, prevents the wheels from locking by regulating braking pressure. Including brake assist to help shorten braking distance by maximum braking-force assistance in abrupt braking (full brake application). Including Cornering Brake Control to stabilise the vehicle when cornering	■
SA853	Automatic lock when driving away	■
	BMW Mobility System, consisting of portable container with 12-V compressor, integrated sealant injection bottle and injection hose	■
	Bumper system, with replaceable deformation elements at front and rear for impacts up to 15 km/h	■
	Child seat ISOFIX attachment, for the two outer rear seats, for securing child seats to seat backrest	■
SA322	Comfort access, "keyless" locking and un-locking of the vehicle	12 900
	Crash sensor, disengages the Center Lock function of the central locking system to facilitate the exit of occupants or expedite outside assistance, switches on the vehicle's interior lighting and activates the hazard warning flashers in order to warn other road users in good time. Activation of the safety battery terminal clamp	■
	Cruise control with brake function	■
SA8TN	Daytime driving lights selectable by Lights menu	■
SA8TG	Double locking function	■
SA5AS	Driving Assist, camera based driver assistance system consisting of Lane Departure Warning, Lane Change Warning, Approach Control Warning, Crossing-traffic warning rear, rear collision prevention and Speed Limit info	■

Code	Safety continued	M5 Competition
SA5AT	Driving Assist Plus, camera and radar based driver assistance system consisting of Driving Assist including Active cruise control with Stop&Go function, Steering and Lane control Assist, Lane Keeping Assist, Crossing-traffic warning front, Evasion Aid and Crossroads warning.	24 800
	Dynamic brake lights, different light functions depending on how brakes are applied: under severe braking the brake lights flashes initially, when the vehicle has slowed to an appropriate speed the hazard warning flashers are activated and the brake lights show normally without flashing.	■
	Dynamic Stability Control (DSC) with extended contents, comprises ABS, ASC, DTC, CBC including DBC. Prepared for CBS. Including anti-fishtailing logic for trailer, pull-away assist, dry braking, braking readiness	■
	Dynamic Traction Control (DTC), switchable functions of Dynamic Stability Control (DSC) for improved traction	■
	Follow-me-home function: If the headlight flasher is activated after the ignition has been shut off, the low-beam headlights continue to shine for a period of time. The duration can be set using the iDrive Controller.	■
	Front airbag system for driver and front passenger, side airbag system (pelvis/thorax) in the front seat backrests, intelligent control of airbag trigger, front airbag deactivation via key	■
	Head airbag front and rear, curtain head protection system that also protects rear-seat occupants, including protective sail as splinter protection	■
	Headrests, for all seats	■
SA610	Head-up Display. Full-colour projection onto the windscreen of information relevant to driving and specific to the situation, with automatic brightness control and 3D graphics for junction view (realistic display of turns and junctions). User-friendly display adjustments possible by means of the iDrive Controller. The following can be displayed: navigation information, speed, Speed Limit Info, warning information from the driver assistance systems, situational display of entertainment and communication lists, Driving Experience Control modes, BMW EfficientDynamics functional contents and check control messages with 3D graphics, (display of contents depending on optional equipment ordered).	■
SA5AC	High Beam Assist	■
	LED rear lights, brake light, turn indicators and rear fog lights in LED technology.	■
SA2PA	Locking wheel bolts	■
	Parking brake, electromechanical, including Automatic Hold function	■
SA508	Park Distance Control (PDC) front and rear	■
	Reversing light in rear light cluster, halogen	■
	Safety battery terminal clamp	■
	Side airbags for driver and front passenger, integrated into the front seat backrests (thorax)	■
	Steering column adjustment, electrical in height and length	■
SA2VB	Tyre Pressure Monitoring, sensors on all four wheels facilitate an exact and individual monitoring of the pressure in each individual tyre	■
SA2VC	Tyre repair kit, Tyre sealant bottle, electrically-operated 12V compressor	■
SA428	Warning triangle and first aid kit	■
	White direction indicator lights	■

Code	Entertainment and communication	M5 Competition
SA6U3	BMW Live Cockpit Professional: Display cluster consisting of a fully digital 12.3" instrument display and a highresolution 10.25" Control display which includes BMW Operating System 7 with variable, configurable widgets that display information in real time, Navigation system, hard drive supported system with 20GB memory. The intuitive operation options include Voice Control, direct-selection buttons, iDrive controller, touch operation and Gesture control is available as an option	■
SA6C3	Connected Package Professional: Consisting of: Remote Services, Concierge Services, Real Time Traffic Information, preparation for Apple CarPlay, Connected Teaser Package: (normally for three months), *Connected Music, *Connected Office *market specific	■
SA6F1	Bowers & Wilkins Diamond surround sound system. Featuring a fully active 10-channel amplifier with 1400W and 16 loudspeakers: 1 centre midrange speaker in the middle of the instrument panel with Bowers & Wilkins designation, 1 centre tweeter in the middle of the instrument panel with Bowers & Wilkins designation, 2 diamond tweeters in the mirror triangles (illuminated and featuring, Nautilus™ spiral technology), 2 illuminated midrange speakers in the front door trims featuring Kevlar® technology, 2 illuminated midrange speakers in the rear door trims featuring Kevlar® technology, 2 tweeters in the rear door trims, 2 midrange speakers in rear parcel shelf, 2 tweeters in rear parcel shelf and 2 central bass speakers underneath the front seats featuring Rohacell® technology. Including Quantum Logic Surround with 7-band aqualiser (Dynamic Sound Equalising) and three analogue crossover networks for a constant sound quality in all seats. Stainless steel finishers with 'Fibonacci' hole pattern design ensure an optimum degree of efficiency for a pure sound experience	42 600
SA6UK	BMW Night Vision with person recognition. Camera based system employing infrared technology to enable people and animals to be seen more readily in poor visibility situations. In potentially dangerous situations, a yellow pre-alert appears and in very critical situations an acute approach warning with red warning symbol will appear, an acoustic warning will sound and the brakes will be preconditioned. Includes Dynamic Marker Lights that illuminates the endangered objects through the main headlights	29 100
SA6NW	Telephony with wireless charging. Wireless connection for compatible Bluetooth® mobile phone with extended functionality including handsfree operation. Wireless connection for audio streaming possible with the vehicle. Smartphone holder at the side of the centre console with inductive charging according to Qi standard for suitable mobile telephones (including LED charge level indicator and forgotten mobile phone warning) and connection to the external aerial possible. For ensuring the charging function and external aerial connection, the smartphone must be positioned with its back to the charging surface. For selected smartphones without an inductive charging function according to Qi standard (e.g. Apple iPhone 5, 5s, 6 & 6s), special charging cases are available via BMW Parts and Accessories. Extended functionality (also dependant on the features of the Bluetooth® / USB device) include: improved hands-free capability for front passenger by provision of a second microphone, 2 x USB connections with 2.1A charging current for shorter charging times of smartphones and tablets, Bluetooth® audio streaming (possibility of playing compressed videos via the USB interface), at any given time 2 mobile phones and one audio player can be paired via Bluetooth®, display of organiser data from the customer's telephone on the Control Display by selecting 'Office' or 'Communication' from the menu, display of contact photos from the address book of the customer's telephone on the Control Display, display of album covers and software update for multimedia and telephony via the USB interface (for information on compatible devices, see www.bmw.co.za/bluetooth)	■
SA688	Hi-Fi loudspeaker system harman/kardon, 1 midrange speaker in the instrument panel, 1 tweeter in the instrument panel, 2 tweeters in mirror triangle, 2 midrange speakers in the front door trims, 2 midrange speakers in rear side trims, 2 tweeters in rear side trims, 2 woofers as central bass speakers underneath the front seats, 'harman/kardon' designation as aluminium clasp on tweeters in the mirror triangle, external amplifier in luggage compartment, amplifier power 360 W	■
SA6CP	Preparation for Apple CarPlay. Enables wireless and comfortable usage of your iPhone® in your vehicle via Apple CarPlay®. Smartphone content like music, messages, telephony, selected third-party apps and navigation can therefore be displayed and operated seamlessly via the user interface of the vehicle. The compatibility and functional scope of your iPhone® with Apple CarPlay® depends on the modelyear of the iPhone® and software version installed on it and must be enquired about with the mobile phone manufacturer. If you useApple CarPlay® preparation, selected vehicle data is transferred to your iPhone. Further data processing is the responsibility of the mobile phone manufacturer or 3rd party app provider. The mobile phone manufacturer is responsible for all contents and functions displayed in the vehicle via Apple CarPlay® preparation	■
SA6FH	Rear-seat entertainment Professional, incl. 2 high resolution tilttable 10.2" screens in the rear, high resolution (1 280 x 720) with BluRay® drive. Operation via remote control. Connectivity for MP3 players, game consoles, USB devices and headphones possible (headphones not included), only with SA575	34 000
SA601	TV function, analogue	16 700

Code	BMW ConnectedDrive Services and Apps***	M5 Competition
SA6AK	ConnectedDrive Services, provides the services and functionalities of BMW Online and BMW Apps. BMW Online: in-car online portal that offers news, weather forecasts, online-search and Office functions. BMW Apps: permits the integration of certain smartphone applications (Apple and Android devices) such as the free BMW Connected App. This enables access to functions such as Twitter, Wiki Local, news and web radio via the iDrive system and Control Display (BMW ConnectedDrive Services only supported in South Africa)	■
SA6AC	Intelligent emergency calling, telematics service with manual emergency calling via SOS button and automatic emergency calling in case of an accident (based on a complex algorithm analysis of different sensor data). Transmitted data to the BMW Call Centre include information like vehicle location, severity of accident and status of the front airbags and seat belts (Manual and Automatic Emergency Call - without data transmission - supported in Namibia, Botswana and Swaziland)	■
SA6AE	TeleServices, telematics service for automatic and manual service need transmission, and for initiation of breakdown assistance (BMW Teleservice Call, BMW Teleservice Breakdown Call and BMW Teleservice Battery Guard). Depending on the situation, service information is transmitted on an as-needed basis to the customer's preferred BMW Dealership (TeleServices only supported in South Africa)	■

Code	Service	M5 Competition
	5 Year/100 000km Motorplan, non-contributing service and maintenance contract	■
	BMW On Call (outside South Africa, On Call is supported in Botswana, Namibia and Swaziland)	■

***BMW CONNECTED DRIVE SERVICES – INFORMATION.

1. General information

Bayerische Motoren Werke Aktiengesellschaft, Petuelring 130, 80788 München, headquartered in Munich and registered in the Commercial Register at the local court of Munich under HRB 42243 (hereinafter referred to as "BMW") provides the customer with certain vehicle-related information and assistance functions (hereinafter called "Services") under the name of "BMW ConnectedDrive". BMW collects, stores or processes car-related data in compliance with applicable law and only to the extent necessary to provide the Services. BMW does not collect, store or process personal data in the course of rendering the Services – except where this is explicitly stated in the description of the individual Services. In the case of Services that require personal data to be collected, stored and processed so that such Services can actually be provided, BMW informs customers of this in advance by providing this data protection notice. The Services are provided by means of a SIM card installed in the vehicle. Charges for the speech and data connections are included in the price for the Services.

2. BMW ConnectedDrive basic services

The BMW ConnectedDrive basic services "Teleservices" (6AE) and "Intelligent Emergency Call" (6AC) have already been activated at the point of vehicle transfer. In the case of BMWi vehicles, the basic services will include "Remote Services" (SA6AP) as an additional basic service.

a. Teleservices (SA6AE)

The Service "Teleservices" is aimed at maintaining the customer's mobility. Technical data for the vehicle (e.g. service information on the wear and tear of individual parts, vehicle status information such as control messages, battery charge level, data for identifying and localizing the vehicle in the event of a breakdown) are transmitted to BMW as required or if this process is triggered or ordered by the customer himself/herself. In the case of a service requirement, these data, together with the name and the email address of the customer as stored within the BMW ConnectedDrive customer portal, will be forwarded via the SIM card permanently installed in the vehicle to the responsible Service Partner, BMW Roadside Assistance or appropriate service provider for the purpose of establishing contact or arranging an appointment. These data will be stored by the recipient until the operations have been duly processed. No additional transfer of the data to third parties takes place. Technical data are transmitted from the vehicle to BMW at regular intervals, where they are evaluated for the continuing development of BMW products, in a process called the "Teleservice Report". This exclusively involves purely technical data relating to the status of the vehicle. Other data, such as position data, are not transmitted within the scope of the "Teleservice Report". The "Teleservice Battery Guard" continuously inspects the battery charging status of the vehicle. If the battery charging status falls below a defined level, information to this effect is transmitted to the responsible Service partner, who will, if necessary, establish contact with the customer in order to arrange a service appointment. By registering in the BMW ConnectedDrive customer portal ("My BMW ConnectedDrive"), the customer can also arrange to be notified of a critical battery charging status due to a parking light having been left switched on by text message or, in the case of BMWi, by push mail.

b. For BMWi vehicles only:

The "Teleservice Battery Guard" continuously monitors the battery-charge status of the vehicle. If the battery-charge status falls below a fixed value, the responsible service partner will be informed. The responsible service partner will then contact the customer if necessary to arrange a service appointment. By registering in the BMW ConnectedDrive Customer Portal, the customer can also be informed about a critical battery status by text message or, for BMWi by push mail, by means of illuminated side or parking lights. Additional vehicle status information includes information about the location of the vehicle and information about the charging status, data about every begin, end, interruption and errors during charging as well as turning on and off the vehicle is sent from the vehicle to BMW and received by the BMW Car IT GmbH. This data is used for verification and quality assessment of charging stations. Verified and assessed charging stations will be displayed to the customer in the navigation system, BMW Online, BMW Remote App and in the ConnectedDrive Customer Portal. Furthermore, the identification of potential locations for new charging stations or new locations is possible.

The "Efficiency" service uses vehicle status information that every time the vehicle is turned off is sent from the vehicle to BMW. This data is calculated from driving performance measures, and can be viewed in the BMW Remote App and in the BMW ConnectedDrive Customer Portal.

The driving performance measures are statistically processed within the "Community" function with other BMWi drivers and shown as anonymous within the BMW Remote App and the BMW ConnectedDrive Customer Portal. The service "Community" first requires the consent of the customer within the customer portal or in the BMW Remote App.

The service "Range Map", "Route to Vehicle", "Vehicle Position" uses vehicle status information as well as information about the location of the vehicle, that every time the vehicle is turned off is sent from the vehicle to BMW. This data is used to represent the geographical position of the vehicle, which is displayed in the BMW Remote App and in the ConnectedDrive Customer Portal.

c. Intelligent Emergency Call (SA6AC)

When the crash sensors are activated (air bag deployment, front seat belt tensioners, etc.) the Service "Emergency Call" triggers an emergency call to the BMW emergency switchboard via the integrated telephone unit. An employee then establishes contact with the customer, enquires about the condition of the vehicle occupants and alerts the rescue services. The "Emergency Call" Service can also be activated manually in order to summon assistance for other road users. Use of the Service "Intelligent Emergency Call" requires the identification and localisation of the vehicle as well as

transmission of the information necessary to provide assistance to the responsible emergency call control centre. The user's request as well as the necessary data will be transmitted to service providers commissioned by BMW to perform the Services and will be used by this service provider exclusively for providing the respective Service and stored until the operations have been duly processed. In addition, for the purpose of warning other road users, certain completely anonymous environment-related information is used for traffic information and therefore forwarded to a service provider. No additional transfer of the data to third parties takes place.

d. BMW Roadside Assistance

The Service "BMW Roadside Assistance" can be triggered manually by the customer in the event of a technical fault. In addition to the current position of the vehicle, the vehicle identification number, colour and model of the vehicle are also transferred to the Mobile Service of BMW during this process. The data are transmitted to the service provider commissioned by BMW to perform the Services, who uses them for purposes of managing the service provision and stores them until the operations have been duly processed. In addition, for the purpose of warning in order to other road users, certain completely anonymous environment-related information is used for traffic information and therefore forwarded to a service provider. No additional transfer of the data to third parties takes place.

e. Automatic Map Update (depending on the vehicle equipment)

The Service "Automatic Map Update" automatically updates the map data stored in the BMW navigation system of the home country up to four times a year. The Service runs for a period of two years from the initial registration of the vehicle. The customer can renew the Service at a charge after it has expired via "My BMW ConnectedDrive" at www.bmw-connecteddrive.co.za. In order to use the service "Automatic Map Update" the vehicle's identification and localization during the update process are a prerequisite.

f. Anonymous evaluation of sensor data and usage information for data quality enhancements and product development

For the purpose of enhancing service data quality and product development, vehicle sensor data of the surrounding traffic infrastructure (usually supplemented with time and location reference information), the vehicle status and additional usage information are being evaluated within the vehicle, transferred to BMW and anonymised immediately. It is impossible to trace the anonymised vehicle sensor data and usage information back to an individual customer. This vehicle sensor data includes (amongst others) information about traffic signs, traffic lights, construction sites, local hazards, traffic flow, road characteristics, parking spots, or vehicle error entries. For example, information about traffic signs are being used to enhance map data quality and to optimize route guidance. Local hazards like fog are being used to enhance data quality of traffic information and to avoid accidents.

The usage information is collected to create anonymous usage statistics about the system functionality. Based on this information BMW is continuously enhancing the experience and quality of its products and services.

The transmission of vehicle sensor data to BMW is activated by default. However, a customer can freely configure the categories of information (e.g., information about the traffic infrastructure) in the data privacy menu of a vehicle for which the transmission to BMW shall be allowed. The transmission of vehicle sensor data can also be deactivated completely by a customer. In addition, the data privacy menu of a vehicle provides detailed information about what the categories of vehicle sensor data are evaluated and what information is being transferred. The submission of usage information is deactivated by default, but the user can activate and configure the submission of usage information in the data privacy menu of the vehicle. Users who activate the submission of usage information are helping BMW to further enhance the quality of its products and services.

3. ConnectedDrive Services (SA6AK)

a. BMW ConnectedDrive Services

The "ConnectedDrive Services" (6AK) service is activated for 36 months after first registration. The customer can extend the service for an additional charge beyond the initial period via the BMW ConnectedDrive Customer Portal.

b. BMW Connected+

"BMW Connected+" is available for 12 months after initial registration.

The customer can extend the service for an additional charge beyond the initial free-of-charge period via the BMW ConnectedDrive Customer Portal (www.bmw-connecteddrive.com).

"BMW Connected+" is an upgrade to BMW's personal mobility companion BMW Connected. The "Plus" stands for a more seamless integration of the BMW Connected app into the BMW vehicle and offers a wider range of personalised services powered by BMW's Open Mobility Cloud.

In order to use "BMW Connected+" the BMW Connected mobile application needs to be installed on the customer's mobile device and the customer's vehicle needs to be paired to his/her ConnectedDrive account. In order to use the in-car functions the customer's smartphone needs to be connected via Bluetooth or USB-cable with the BMW Vehicle.

The feature "Send my routes to car" offers the customer the possibility to plan a multi-stop trip before entering the vehicle, e.g. by integrating a recommended fuel stop to the route and then seamlessly transferring the new route to the vehicle.

"BMW Connected Onboard" is the customer's personal command center that gives access to all functions of BMW Connected in one personalised screen in the vehicle. It provides relevant information at the right time in one place and shows personalised content like the next meetings or the traffic situation alongside the current route. "Share Live Trip Status" offers a service to safely share the arrival time and current live whereabouts in a map view with family, friends or business partners. They receive a link to a dedicated website where they can find all necessary information about the trip status.

"BMW Connected+" allows seamless door-to-door navigation from the customer's current position to the BMW vehicle and from the vehicle to the final destination also including walking times.

The feature "My Destinations" gives easy access to all relevant destinations anytime and on all BMW Connected touchpoints in and outside of the BMW vehicle.

Details about the processing of personal data in course of the "BMW Connected+" services can be found in the privacy policy of BMW Connected.

c. BMW Online

The Service "BMW Online" is a mobile Internet portal that provides various information services such as current weather conditions and the latest news. The customer can query local information via the online search function. The addresses found can be adopted directly into the navigation system as destinations. In addition, the customer also has access to office functions with the Service "BMW Online".

BMW aims to provide an advanced and high-quality range of information services within the scope of BMW Online. To ensure that this aim is met, the information services provided within the scope of "BMW Online" undergo regular inspection. As a consequence of this inspection, it is not only possible for further information services and functionalities to be added but also for individual information services or constituent parts thereof to be removed from the "BMW Online" portfolio temporarily or even permanently.

Use of the Service requires identification of the vehicle and processing of the information needed for providing assistance. The data are subsequently deleted. When the Points of Interest query is used, the customer's enquiry is transmitted, where appropriate, to the service provider commissioned by BMW to perform the Services, where it is used exclusively for providing the respective Service and stored until the operations have been duly processed. The data are subsequently deleted. No additional transfer of the data to third parties takes place.

d. Send to Car

The Service "Send to Car" provides the option of transmitting complete address data records from the customer's personal computer directly to the vehicle via "My BMW ConnectedDrive". This can take place either before or during the journey. Addresses can be transferred to the telephone directory or to the navigation system as a destination.

The Service "Send to Car" is supplemented by the "Send to Car" functions. Addresses can be found on Google Maps™ on the Internet and then sent directly to the vehicle by the driver. This also applies to the Service "HRS Send to Car", which enables the address data record for a hotel room booked with the Hotel Reservation Service (HRS) to be transferred from the driver's own PC to the vehicle. Both address and telephone number can then be called up in the vehicle under the menu command "My Info", from where they can be entered directly into the navigation system as a destination or to the mobile telephone. Calls to third-parties are made at the driver's cost via the mobile telephone connected with the vehicle.

4. Concierge Services (SA6AN)

The "Concierge Services" (SA6AN) service is activated for 36 months after first registration. The customer can extend the service for an additional charge beyond the initial period via the BMW ConnectedDrive Customer Portal.

To use the service, the customer is connected to the BMW call centre at the push of a button using the integrated telephone unit. In this way, data concerning the vehicle's identification, location and – if route guidance is activated – the selected route may be transmitted to the service providers commissioned by BMW to provide the service – in that case, this data shall only be used to help process the provision of the service and shall be retained until all procedures have been properly completed. The data shall then be deleted. Beyond this, no data shall be forwarded to third parties.

5. Real Time Traffic Information (SA6AM)

The "Real Time Traffic Information" ("RTTI" - SA6AM) service is activated for 36 months after first registration. The customer can extend the service for an additional charge beyond the initial period via the BMW ConnectedDrive Customer Portal.

The traffic information required for the service is calculated by a variety of means including using what is known as Floating Car Data. In this sense, every ConnectedDrive-capable BMW functions as a "mobile traffic reporter" (Floating Car). The individual position and sensor data of the vehicle calculated during the trip is transferred – completely anonymously – to BMW and a service provider together with up-to-date time information.

6. Remote Services (SA6AP)

Registration on "My BMW ConnectedDrive" at www.bmw-connecteddrive.de is a prerequisite for the "Remote Services" (SA6AP) function. This Service has to be booked once and can then be used for an unlimited period of time.

Using this Service, the customer can lock or unlock his/her vehicle from a distance via smartphone and, in the case of selected vehicles, sound the horn and flash the lights. At the customer's request, vehicle condition information, such as the geographic

vehicle position are transmitted from the vehicle to BMW. Furthermore, with the special equipment option of auxiliary heating, the customer can also programme the heating periods. The "BMW ConnectedDrive" and "My BMW Remote App" applications are available for iPhone® in the Apple App Store™ and for Android™ in Google Play™. Further information, including that on data processing, can be viewed prior to installation of the applications.

7. eDrive Services (SA6AG)

a. The service "eDrive Services" comprises functions that are displayed to the driver in the vehicle, in the BMW ConnectedDrive App and in the BMW ConnectedDrive portal. The service supports the driver with information relevant to electronic mobility. The service serves among others to verify and evaluate the quality of the charging stations. For this purpose, location information as well as charging process information is sent to BMW and transmitted to the BMW Car IT GmbH for each charging start, finish, interruption and error as well as for each power on and off. Verified and evaluated charging stations are displayed to the customer in the GPS, BMW Online, BMW ConnectedDrive App and ConnectedDrive customer portal. Furthermore, possible locations for new charging stations or locations can be identified.

b. The "Efficiency" service utilises vehicle condition information which is sent from the vehicle to BMW with every vehicle switch-off. These data serve to calculate the driving performance index which is displayed in the BMW ConnectedDrive App and in the ConnectedDrive customer portal.

c. The driving performance index will be statistically processed with the index of other BMW drivers in the "Community" function displayed anonymously in the BMW ConnectedDrive App and the BMW ConnectedDrive customer portal. The service "Community" requires the customer's agreement in the customer portal or in the BMW ConnectedDrive App.

d. The service "Route to the vehicle" and "vehicle position" uses vehicle condition information as well as information regarding the position of the vehicle, which are sent to BMW with every vehicle switch-off. These data serve to display the geographic vehicle position, which is displayed in the BMW ConnectedDrive App and in the ConnectedDrive customer portal.

8. Interconnection of the vehicle with portals and apps (depending on the vehicle equipment)

The Service "Interconnection of the vehicle with portals and apps" transmits vehicle data (e.g. vehicle position, service information, range, etc.) upon certain changes of the vehicle's state (e.g. start of driving, end of driving, locking, etc.) from the vehicle to BMW. These data are used to display the geographic vehicle position, the route to the vehicle and further vehicle condition information in BMW apps and BMW customer portals. The transmitted information is being used for the purpose of quality improvement and the development of connected services and future vehicles in a fully anonymised form. The BMW apps are available for iPhone® in the Apple App Store™ and for Android™ in Google Play™. Further information, including that on data processing, can be viewed prior to installation of the app.

The Service Apple CarPlay Preparation is available for a period of 3 (three) years. While Apple CarPlay Preparation is available for customers, the functionality of this is entirely dependent on any updates which may be published by the developer and any enquiries in this regard should be directed to the developer. For more information on Apple CarPlay Preparation, please go to <http://www.apple.com/ios/carplay>.

9. Availability of the service

The Services described are supplied within Germany for selected models and only for customers whose vehicles are registered in Germany and who have the necessary items of special equipment. "Emergency Call" is available for vehicles with the permanently installed SIM card (P-SIM) in Germany, Austria, Italy, San Marino, Vatican City, France, Monaco, Switzerland, Liechtenstein, Belgium, the Netherlands, the United Kingdom, Ireland, Spain, South Africa, Andorra, Portugal, Sweden, Norway, Czech Republic, Poland, Turkey and Russia. The Services "TeleServices", "Concierge Service", "Remote Services" and "BMW Online" can in principle be called up via the SIM card (P-SIM) permanently installed in the vehicle in every European cellular telephony network. When the Services are used in a foreign country, their scope and properties may vary from the afore-mentioned scopes and properties and differ from country to country. "RTTI" is available in Germany, Austria, Italy, France, Switzerland, Belgium, Luxembourg, the Netherlands, the United Kingdom, Ireland, Spain, South Africa, Portugal, Sweden, Denmark, Norway, Czech Republic, Poland, Turkey and Russia. "V-Info+" is available in Germany, the United Kingdom, France and Italy. The Service "Internet" is exclusively available in Germany.

10. Deactivation

The customer can deactivate the BMW ConnectedDrive basic services "Teleservices" (6AE) and "Intelligent Emergency Call" (6AC) (and "Remote Services" (SA6AP), in the case of BMWi vehicles) at any time at an authorised BMW dealer, a regional BMW branch or an authorised BMW workshop. Deactivation of this service will also deactivate the SIM card installed in the vehicle. This results in the Emergency Call in the vehicle also not functioning. The other services can also be deactivated by the customer (from July 2014 via the BMW ConnectedDrive Customer Portal ("My BMW ConnectedDrive")), although the agreement between the customer and BMW in respect of those services will remain in operation and will not be suspended by the deactivation.

For further information on BMW ConnectedDrive and the General Terms and Conditions of Business and Use for Connected Drive, please visit www.bmw-connecteddrive.co.za.

The BMW Customer Interaction Centre is available on: +27 (0) 800 627771 from Monday to Friday, 8.00 am – 5.00 pm and by e-mail at info@bmw-connecteddrive.co.za

BMW BENEFITS.

BMW Service Concept: always up to date. When you buy a BMW, you can look forward to superb service and comprehensive customer care, with over 3 300 BMW Service Dealerships in more than 150 countries ready to assist you at any time. Thanks to the vehicle's integrated on-board diagnostics system, you will always know exactly when the next service is due, and what work will be required. **Condition-Based Service** measures the condition of key parts subject to wear, tracks fluid levels and monitors your BMW's time- and mileage dependent service requirements. Then simply get in touch with your BMW Dealership, who will provide expert care for you and your car. Staffed by highly trained personnel, your BMW Dealership is also equipped with the latest computer-aided information and diagnostic tools. Important data such as your chassis number, mileage and current service requirements are also stored on your car key, ensuring a quick assessment of your car's status. Meaning that staff have more time to assist you. And naturally, your BMW Service Dealership will have **Original BMW Parts** available for any work to be done. In short - quality and safety are at the heart of BMW Service.

BMW Motorplan. All new BMWs sold in South Africa include a 5 year/100 000 km Motorplan maintenance contract. This covers all service, maintenance and repairs resulting from normal wear and tear, excluding tyres and fuel. As with any maintenance agreement, there are certain exceptions which are clearly specified in the Motorplan agreement. Repairs resulting from negligence or accident damage are not covered. For all BMW models the contract distance can be extended up to 200 000 km, dependent on individual needs.

BMW On Call. In the event of a breakdown, BMW On Call is available 24 hours a day, 365 days a year at 0800 600 777. Specifically trained BMW technicians will do everything necessary to get your BMW back on the road, with telephone or on-site assistance as required. Car rental and/or towing of your car can be arranged if necessary.

BMW Accident Management. BMW Accident Management provides a managed response to an accidental vehicle immobilisation. The service includes using the BMW Approved Repair Centre network and overall coordination by the BMW Customer Service Centre, who will select and approve the best service suppliers in the industry. Call 0800 600 555 for more information.

Original BMW Accessories and BMW Lifestyle Accessories. The comprehensive range of high quality Original BMW Accessories covers every aspect from the exterior to the interior and from mobile communication to transport and safety accessories. BMW Lifestyle Accessories mean that even when you're not driving your BMW, you can still enjoy the unique fascination of the BMW experience with exclusive products from BMW Lifestyle. Your BMW Dealership will be able to assist you with a catalogue of accessories specially suited to your BMW model and you can explore the range of quality BMW Lifestyle products at the same time.

BMW Financial Services. There's only one more thing you could wish for: the perfect financing solution. One that leaves enough scope for all your other wishes. BMW Financial Services offers tailor-made solutions in the areas of leasing, financing and insurance individually developed to suit you and your budget. Leasing through BMW Financial Services lets you realise your dream of driving an exceptional BMW. And you yourself can decide on deposit, duration and the extent of your monthly instalments. A wide range of financing plans from BMW Financial Services meets your every requirement. Your local BMW Dealership will assist you to put together your own individual plan. And if you opt for insurance from BMW Financial Services, you'll be prepared for all eventualities. The comprehensive spectrum of options reflects the safety and quality you'd expect from BMW. For more information, go to **www.bmwfinance.co.za** or call us on 0861 269 346. Your BMW Dealership can also provide you with more details on BMW Financial Services.

Internet. Apart from the international website, www.bmw.com, BMW maintains websites in many countries around the world. Visit the South African website at **www.bmw.co.za** to find out more about options available and to locate dealerships in your vicinity.

BMW Owner's Circle. The BMW Owner's Circle website is a personalised customer website that offers BMW drivers the opportunity to interact with BMW within a secure web environment. Each BMW driver is already a member of this online community, and can activate their membership by registering at **www.bmw.co.za/ownerscircle**. The internet site offers information and functionality specifically relevant to their personal and vehicle profile. A member can:

- Update personal and vehicle information;
- Review Motorplan details and extend their contract;
- See the service history on their BMW and submit online service booking requests;
- Contact BMW via a priority email service;
- View their owner's manual online;
- Track a vehicle that has been ordered as it passes through various production and distribution processes.

Register by visiting **www.bmw.co.za/ownerscircle**.

BMW Driving Experience. BMW Driving Experience is the only driver training programme which offers you the opportunity to expand your driving knowledge and learn to keep your vehicle superbly under control, in a variety of situations, using an exclusive BMW vehicle. You will have an expert companion at your side while you push your driving skills to their very limits in a wide range of driving situations. By passing on their expertise in practical driving situations, our highly skilled instructors will ensure that participants learn as much as possible in the time allotted, as well as having a memorably enjoyable time. Courses covered are:

- M Advanced
- M Drift
- M Intensive
- Safety Package
- Skid Control
- Efficient Driving

Upon purchase of any new BMW M vehicle, customers will receive a voucher for a complimentary M Advanced driving course.

For more information contact us on 0861 BMWDRIVE (269 374), email us at drivertraining@bmw.co.za or visit our website at: **www.bmwdrivingexperience.co.za**.
